Balancing your inner and outer world

The Many Reasons We Recommend Shungite

Shungite is the only known natural source of fullerenes on Earth

Buckminsterfullerene short name BuckyBalls (Buckminster Fuller) is a type of fullerene with the formula C_{60} that resembles a soccer ball, made of twenty hexagons and twelve pentagons, with a carbon atom which has one π bond and two single bonds at each vertex of each polygon and a bond along each polygon edge. Scientists discovered that Shungite receives its healing power from one of its elements, **fullerenes**, a **crystalline** form of carbon. Carbon is an important constituent of living beings. Along with Nitrogen and oxygen, carbon is one of the essential building blocks of organic life. Carbon forms about 18% of the human body. They are believed to be **THE MOST POWERFUL ANTIOXIDANTS** that shield cells from the affect of free radicals.

Electromagnetic Fields/Radio Frequencies (Using Elite/Noble/Silver Shungite 98% Carbon)

- Russian scientists confirm that, in addition to being a natural antioxidant, it can improve immune system function. It also actively interacts with various electromagnetic fields (EMFs, RF, anthropogenic high-frequency, solar, geopathogenic, biofields) and neutralizes their negative impact. It reduces the form and effect of electromagnetic emissions, counteracting the harmful effects of electromagnetic fields and radiation from computers, cell phones, Wi-Fi, and other electronic devices and appliances.
- According to scientific research, it attenuates electromagnetic emissions providing protection from harmful electromagnetic radiation. Shungite appears to transform harmful man-made EMFs into wave forms that are more compatible with our biology. And it does it not by eliminating, but by changing the properties of harmful radiation.
- Research shows, this mineral modifies harmful influence of electromagnetic radiation much better than other stones because it does not become saturated and does not take on a negative charge.

Water - Type II (Because Elite/Noble/Silver Shungite splinters we do not recommend in drinking water)

- Russian scientific research also shows that because of Shungite's unique structure, it grabs onto many different things including chemicals, volatile organic compounds, drugs, chlorine, fluoride, and radioactive particles. It also kills a wide variety of bacteria, viruses, phages and other pathogens.
- Shungite, considered to carry the Yin energy, provides powerful grounding stimulation to the lower parts of the body, including 3 lower Chakras. Try some in your next bath.
- A Healing tool used in energy work, reflexology, massage, and acupressure, as well as for meditating and directing energy to assist in restoring balance, stop inflammation, diminish pain and reduce fatigue.
- It is proven now that Shungite can neutralize a significant number of toxins because it holds a massive quantity of hydrogen, making it very effective for water purification.
- Carbon's naturally porous structure - that result in extremely high filtering capacity.
- "Shungite is an effective sorbent for removal of organic and inorganic substances, pathogenic bacteria and heavy metals from contaminated water. Plainly speaking, it kills pathogenic bacteria, and purifies water.
- Numerous studies confirm that adding Shungite fills water with oxygen, calcium, magnesium and other essential mineral components, while killing bacteria, and removing pesticides, chlorine, and heavy metals. Bad taste and odors disappear too!
- Another good reason to drink Shungite water is because it contains natural antioxidants that neutralize free radicals, which makes it beneficial to our cells and tissues. It is totally safe to put Shungite directly in your glass, or carry in your water bottle. Don't forget your animals or wildlife's water bowl!
- Other areas that benefit from Shungite is in your well water, pond, fish tank, garden, plants and beehives!
